MV7900-23

While bipolar technique is being used, high frequency current flows between the two ends of the bipolar instrument and focuses only on the small surface of tissue placed between them. There is no dangerous flow of current through the patient's body. This minimises the risk of burns in areas that are distant from the surface being operated on. Bipolar techniques are safer than monopolar techniques.

TO ASSIST IN VISUALISING MICRO VESSELS DURING SURGERY

Description: Silicon strip with 1mm grid on one side and plain on reverse side, available in blue, green and yellow colours. Packed in boxes of 12 pieces.

Application: For use in micro surgical anastomosis of micro vessels under a microscope to allow the surgeon to better visualise the detail of the vessels, being closed.

The Visibility Material can be used either with the grid side up to give the surgeon a scale of the vessel, alternatively the reverse plain side can also be used.

The material has a non reflective surface eliminating distractions from theatre lighting and has a non-tacky finish to aid mobilisation of the Vessel.

Ordering details:

COLOUR	ordering code
Yellow	VB-2
Green	VB-3
Blue	VB-4

- X-Ray opaque silicon material
- 1mm grid for accurate measurement of vessels
- Latex free material
- Sterile packed in boxes of 12

- Light and compact design
- Extremely durable
- A unique gripping surface
- Smooth sliding bar action on all approximator clamps
- Clamp profile with parallel sided jaws
- Matt or black finish

“A” or “V” Pattern?

Throughout the series, the “V” pattern is the all-purpose clamp, commonly used on all veins, and almost all arteries. The “A” pattern, available in all sizes, is designed for exceptionally thick-walled vessels and slippery arteries. The slight incurve of the tips of the “A” pattern jaw provides extra security against slippage.

DISPOSABLE MICRO ARTERY CLAMPS

The Biover[®] microvascular clamp is a high precision instrument and has been developed under the guidance of international surgeons.

- Highest quality (Polycarbonate & Stainless Steel)
- Single or double clamps sterile, ready for use
- Three sizes available for arteries
- Latex Free and Radiolucent
- Exact pressure every use
- Single or double clamps supplied in packs of 10
- Each box easily identified by a different colour
